

First ever dog pregnancy rapid test for home use.

Developed with breeders and veterinarians.

Quick, easy, safe, reliable.

Rapid test for home use, reading time 10-15 minutes.

Accuracy 96%, patent pending.

For the best accuracy, we recommend testing 28 days after ovulation.

Why you should choose testing your dog at home?

Save time.

Test when it best suits you and your dog. No need for scheduling, no need for travelling and driving around. The test kit contains all equipment needed to perform the test at home.

Limit Stress.

All additional stress during dog pregnancy should be avoided. Stress free sounds good to you too as a breeder, right?

Worry less.

Phantom pregnancies can trick the best of us. It's better to be sure.

Accurate and fast result.

The test has an accuracy of 96 % on all dog breeds and sizes. Get a result in 10-15 minutes!
